PROFESSIONAL SUMMARY

Software Engineer with 4.5+ years building scalable enterprise web applications using Angular and TypeScript. Uses GitHub Copilot, Claude Code, and Cursor as daily AI-assisted development tools, and applies GenAI, AI agents, and agentic AI patterns to ship faster without dropping quality. Proven track record in large-scale UI migrations and measurable performance improvements in hospitality technology.

TECHNICAL SKILLS

Frontend: Angular (1.x–20), Angular Material, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS
Libraries & State Management: NgRx, RxJS, Tailwind CSS, Reactive & Async Programming
AI-Assisted Development: GitHub Copilot Pro, Claude Code, Cursor (code generation, refactoring, debugging, code review); Figma MCP for design-to-code
GenAI & Agents: GenAI, AI agents, agentic AI solutions, prompt-based development workflows
Backend: Python, FastAPI
Testing: Jest, Unit Testing, Test-Driven Development (TDD)
API Integration: RESTful APIs, HTTP Client, Observable Patterns
Tools & DevOps: Git, Azure DevOps, Jenkins, CI/CD
Methodologies: Agile, Scrum, Sprint Planning, Code Reviews
Currently Learning: .NET Core, C#

PROFESSIONAL EXPERIENCE

Software Analyst — April 2023 – Present

Agilysys Technologies India Pvt. Ltd. — Chennai, Tamil Nadu

Product Maintenance & AI-Accelerated Feature Development (Angular 20)

- Engineered and maintained production-grade enterprise hospitality platforms using Angular 20 and Angular Material, enhancing platform stability through consistent bug resolution and implementation of key feature requests.
- Delivered complex feature work faster by combining Figma MCP for design-to-code with GitHub Copilot, Claude Code, and Cursor for implementation, preserving design fidelity and test coverage.
- Diagnosed and resolved complex bugs across the application, ensuring high reliability and consistent user experience.
- Collaborated within a cross-functional Agile team to deliver complex software features through sprint delivery and rigorous code reviews.

UI Migration: AngularJS 1.x → Angular 16

- Led full-page migration of complex enterprise modules to Angular 16 using TypeScript, SCSS, and Tailwind CSS.
- Improved page load performance by 20% on Guest Profile module by consolidating redundant API calls into a single optimized GET request.
- Reduced application overhead by 15% through NgRx state management, eliminating duplicate API calls.

Member Technical Staff — September 2021 – April 2023

Zappyworks / Aardhraa Technologies Pvt. Ltd. — Kumbakonam, Tamil Nadu

- Implemented and integrated Zoho suite (Creator, CRM, Books, Invoice, Inventory, Payroll, Cliq) for enterprise clients.
- Developed dynamic web interfaces using JavaScript and REST API integrations within Zoho Creator widgets.
- Built automation tools for purchase order tracking; optimized CRM pipelines to improve lead-to-customer conversion rates.

AWARDS & RECOGNITION

Super Squad Award — Agilysys Technologies: Recognized for exceptional teamwork in delivering a highly complex enterprise web module under critical project timelines.

EDUCATION

B.E. Mechatronics Engineering — Coimbatore Institute of Engineering and Technology — 2016 – 2020
